# What To Expect In 2025

- State-wide Reach
- Breakout Sessions for Specific Job Functions
- Increased Attendance

With support from your department, we aim to **extend the event invitation statewide** in Idaho, targeting all safety stakeholders. This expansion will enhance networking opportunities and enrich the school-safety discussion.

**Breakout Sessions**, covering a variety of topics will further curate the attendee experience, allowing them to choose sessions that most align with their goals or interests.

Designating an **in-service training day in 2025** and implementing a refined marketing approach, informed by insights from the 2023 event, will double attendance in 2025.
