In this proposed FY2013 budget, Eastern Idaho Public Health District is seeing positive signs that the economy is starting to rebound in some areas. This is encouraging since the agency's operating budget has been consistently reduced over the past four years. Our agency has worked very diligently to respond to the economic challenges we have been faced with, which we have done successfully. We have been able to generate savings in salaries and operating expenses, which has benefited us by not having to draw upon carryover dollars to balance our budget, something that we had anticipated doing in Fiscal Years 2009, 2010, 2011, and 2012.

Revenue Highlights

State Appropriations

In FY2013, State Appropriations to the seven public health districts was \$8,136,100 (SB1351). This represents a 3.7% increase in appropriations over the previous year, and the first increase in appropriations in four years. For EIPHD, this was an increase of \$38,000, for a total State Appropriation of \$1,058,800. This increase was to help the districts support a 2% salary increase and to help fund increases in the cost of health insurance benefits (as discussed in Expense Highlights below).

County Appropriations

Appropriations from the counties has remained level at \$961,867 since FY2009. However, we feel strongly that an increase in appropriations is needed this year. This budget proposal includes a 2% increase in County Contributions over FY2012.

Fees

One indication that the economy is starting to recover is that we are anticipating a slight increase in fee revenue for this fiscal year of 3% or \$33,900. We are anticipating a slight reduction in Reproductive Health fees, but increases in the Food, Septic, and Immunizations program fees.

Contracts

While some of our programs have experienced decreased contract funding, others have experienced increased funding. Overall, this FY2013 budget reflects an increase in contract funding of \$115,639, representing a 3.8% increase. Increased contract funds are anticipated for Tobacco Education and Cession, Health Preparedness, and Public Water program, as well as from a new contract with the Idaho Department of Water Resources. Programs expecting contract reductions include WIC and STD/HIV Prevention.

Expense Highlights

Salaries and Benefits

After enduring several years without salary increases, this year the Idaho Legislature approved a 2% across-the-board salary increase for all state employees, which was written into the district's appropriation bill (SB1351). The salary increase applies to all permanent classified employees who have a performance rating of "achieves" or better. This proposed FY2013 budget does include a 2% salary increase for eligible employees, at a cost of \$77,840 for salary and benefits.

Furthermore, we are budgeting for an increased cost for the employer's portion of health insurance premiums. In FY2012, our cost was \$7,040 per employee; for FY2013, our cost will be \$8,550 per fulltime employee, an increase of 21%.

Operating Expenses

In this proposed budget, all divisions have done an excellent job of keeping their operating expenses in line. In fact, most divisions' operating expenses are either level or reduced compared to last year. The exception is in the Health Preparedness Division, which increased operating expenses by approximately \$137,000. Of this, approximately \$81,000 is a result of an increase in ASPR pass-through funds. Another \$30,000 represents additional funds being allocated to third part contractors that provide our tobacco cessation classes, with this expense being covered by an increase in contract funding.

¹ Counties' Contributions Note: "Actual Budget" columns show County Contributions based on when cash is received from the counties by the District. "Original/Proposed Budget" columns show county contributions based on the appropriated amount. The District's fiscal year ends June 30; whereas counties' fiscal year ends September 30. This creates a cash flow timing difference. On page 14 is a historical chart of County Contributions. These numbers are based on county funds appropriated by the health district's fiscal year, not when cash is received from the counties.
